

Make a Stand against breast cancer

Pink Lemonade

1 in 8 women

will be diagnosed with breast cancer

1.8x

greater is your risk of breast cancer if an immediate female relative has been diagnosed

5-year survival rates with treatment are up to 98% when cancer is detected early

only 50% of women over forty have their annual mammogram

overweight women suffer a 30% higher mortality rate than women who maintain a healthy weight

eating healthy

maintaining proper weight and limiting alcohol are habits that will help you avoid breast cancer

American women have survived breast cancer

2,140 men

were diagnosed with breast cancer in 2011, making up 1% of all cases

out of every 100,000 cases of breast cancer are in Texas
